

Exocet Diesel Supreme

Market The Best Quality Diesel

Exocet Diesel Supreme is used to transform standard BS EN 590 diesel into the best quality diesel available from any major fuel retailer (e.g. increases cetane number from 51 to 57). Many diesel engines automatically adjust to their combustion to suit the quality of fuel being consumed. Exocet Diesel Supreme provides fuel consumption, power and emission improvements across a range of vehicle operating conditions and mitigates problems that can occur when running on biodiesel. When the best is required, Exocet Diesel Supreme delivers.

Opportunity To Sell Highest Quality Forecourt Diesel

Exocet Diesel Supreme

- Increase fuel economy
- Power and acceleration boost
- Reduces emissions
- Reduced tank filling time/lower fuelling spillage
- Enhanced engine life and corrosion protection
- Combustion chamber deposit control
- Increases the life of a DPF

Each 1 litre bottle treats 2,000 litres of diesel
